

ALLEN P. JISON

Full-Stack Developer | Web3 & Smart Contract Engineer

allenpjison@gmail.com | [+91 75599 62699](tel:+917559962699) | linkedin.com/in/allenpjison | github.com/LyfSeeker

Full-Stack and Blockchain Developer with proven expertise in architecting scalable decentralized applications (dApps) and secure web platforms. Proficient in React.js, Node.js, smart contract development, and AI-assisted application workflows. Proven ability to bridge complex Web3 infrastructure with simple, user-friendly designs to deliver **high-performance, production-ready solutions**.

EDUCATION

B.Tech, Computer Science & Engineering - Christ College of Engineering **2023 - 2027**
• CGPA: 7.5
12th ICSE Board - Christ Vidyanikethan **2021 - 2022**

EXPERIENCE

ENIAC | Business Development Intern **Mar 2026 - Present**
• Spearheaded strategic outreach initiatives and managed direct client communications to optimize engagement and drive ecosystem growth.
• Streamlined operational workflows and onboarding processes, improving cross-functional efficiency within a fast-paced Web3 environment.
Talrop | Student Intern **Jan 2025 - May 2025**
• Acquired hands-on experience with industrial software development lifecycles, agile workflows, and enterprise-grade technology standards.
5ireChain | Growth Intern **Dec 2024 - Mar 2025**
• Drove ecosystem expansion and community engagement initiatives for the 5ireChain blockchain network.
• Analyzed Web3 market trends to identify and execute strategic growth opportunities, significantly enhancing developer relations.

PROJECTS

Web3ads **Mar 2026**
• Engineered a decentralized advertising platform featuring a custom-themed user interface, optimizing the frontend for high engagement and responsive design.
• Collaborated within a team of 4 to manage end-to-end development and seamless deployment.
Lucidus'26 (Official College Fest Website) **Jan 2026**
• Developed the high-traffic event website, prioritizing mobile responsiveness and performance optimization to deliver a seamless user experience and 100% uptime.
Cinelenz (Movie Sentiment Analysis) **Oct 2025**
• Applied sentiment analysis and classification algorithms to process large social media datasets, accurately categorizing movie reviews and audience trends.
• Worked alongside a team of 4 to build, scale, and integrate the core data processing pipeline.
Zynqtra (Networking dApp on Arbitrum) **Sep 2025**
• Developed a decentralized networking application, integrating secure smart contracts with a modern React frontend to enable wallet-based interactions.
• Partnered with a team of 4 to architect secure smart contract logic and user workflows.

HACKATHONS & ACTIVITIES

ETHMumbai 2026 *2nd Prize*
• Engineered a robust Web3 integration under strict time constraints, securing top placement out of competing regional development teams.
BNB Hack Kerala *Tier 4 Special Recognition*
• Awarded for the advanced technical implementation of a decentralized application within the competitive BNB Chain ecosystem.
Arbitrum Open House Hackathon *Participant*
• Built functional dApps focused on resilient smart contract architecture and seamless React frontend integration.
CineHack - National AI Hackathon *Participant*
• Rapidly prototyped AI-driven technical solutions tailored for modern cinema and media consumption platforms.
Base Hyperthon - Kochi *Participant*
• Rapidly developed and presented a functional mini-application under tight, 3-hour constraints, demonstrating agile problem-solving.
Relay Coding - Christ College of Engineering *2nd Prize*
• Secured second place by rapidly solving complex algorithmic challenges in a time-constrained team relay format.
Volunteering *Event Volunteer*
• Contributed to event operations and community networking at **India Blockchain Week**, **Build On Chain Hackathon**, and **Web3 Kerala Summit**.

SKILLS

Languages: JavaScript, Java, Solidity, Python, C
Frontend: React.js, HTML5, CSS3
Backend: Node.js, SQL Databases

Blockchain: Smart Contracts, Hardhat, Foundry
Tools: APIs, Docker, Git, Postman
